

CIVIL TREATMENT OF LOTS IN CUT

This warranty applies to residential allotments prepared by Shadforth Civil Contractors ("Shadforth") and included on Plan Number 122 within Mirvac's Everleigh master planned community at Greenbank Queensland.

Shadforth, at the direction of Mirvac, has carried out works to mitigate residential dwelling construction excavation risk in response to the potential presence of rock within Everleigh.

Shadforth warrant that material to a depth of 500mm below the as-constructed finished surface level has been managed to provide for future excavation with machinery typical of residential detached dwelling construction.
