2.2 Deposit

- (1) The Buyer must pay the Deposit to the Deposit Holder at the times shown in the Reference Schedule. The Deposit Holder will hold the Deposit until a party becomes entitled to it.

Residential Design Standards and Guidelines

These standards and guidelines have been prepared to assist Everleigh purchasers (and their builders/designers) to construct well designed, quality homes and to join Mirvac in creating great places for life.

The standards and guidelines are intended to help you add value to your home and protect your investment by creating an attractive streetscape.

Great design creates a welcoming and attractive streetscape. This not only improves your quality of life but establishes Everleigh as a great place to live and a place in which you will be proud to be a part of.

Street Appeal

These standards and guidelines will assist in making your home part of an attractive streetscape. This is achieved by using the right materials and colours and including some cost effective design elements to the front façade.

Fencing

Fences which are visible from the street are an important part of the streetscape. So at Everleigh we ask that these are of a higher standard and quality but for most lots this is only a short length and the balance of the fencing can be the neighbour type fence.

Landscaping

A great way to make your home unique is through landscaping. We ask that you include landscaping that will grow into an attractive low maintenance front yard that complements the parks and bushland that are a great part of Everleigh. This document provides design standards to ensure that cohesive and attractive landscaping is established.

How the Residential Design Standards and Guidelines Work

The Everleigh Residential Design Standards and Guidelines (Design Standards & Guidelines) sets out:

- **Standards** which are mandatory compliance elements; and
- **Guidelines** which are non-mandatory elements that provide further information and suggestions to improve design and quality of life.

The Design Standards and Guidelines are technical in nature and it is recommended that you speak to your builder or an Everleigh sales team representative who will be able to guide you through this process.

The Design Standards and Guidelines consists of three parts as follows:

AUTHORITY REQUIREMENTS

Design and Siting Standards

Directs customers to the Approved Plan of Development – Envelope Plan and Design Criteria documents which include the **mandatory design standards for siting your home** to the specific characteristics of your lot. These documents are available in Annexure A and B.

MIRVAC REQUIREMENTS

Architectural and Landscape Standards

Provides the **mandatory architectural and landscape design standards** to include in all homes in Everleigh which are essential to making Everleigh a place in which you will be proud to live.

GOOD PRACTICE

Sustainable Living Guidelines

Provides **suggestions** to introduce some easy ways to potentially reduce your future ongoing costs and the impact on the environment.

Alternative design solutions may be presented to the Everleigh Design Committee and will be assessed on individual architectural merit. The Design Committee at its absolute discretion may approve alternative design solutions where it is considered that they achieve the overall intent and desired outcomes of the Design Standards & Guidelines.

Building @ Everleigh Portal

We understand that keeping track of all this information can be a challenge and have established a web portal to assist.

The **Building @ Everleigh Portal** is a one stop shop for information relating to your lot, including but not limited to the following:

- Residential Design Standards & Guidelines
- Fact Sheets and Manuals
- Approved Plan of Development – Envelope Plan
- Approved Plan of Development – Design Criteria
- Survey Plans
- Disclosure Plans
- Civil Design Drawings
- Services Location Plan
- As Constructed Drawings
- Compaction Reports
- Acoustic Report
- Bushfire Management Plans

The information available in the **Building @ Everleigh Portal** will help you and your builder make informed decisions regarding the design of your home.

The **Building @ Everleigh Portal** is accessible via the Everleigh website or speak to an Everleigh sales representative.

The Approval Process

You will need both the Design Approval from the Everleigh Design Committee (Design Committee) and Building Approval from Logan City Council (Council)/building certifier before you can commence construction.

Mirvac has developed a streamlined process based on previous experience to ensure that you can start building your home and garden as soon as possible.

HOT TIP!

The Design Committee often receives an influx of applications at the time of settlement. To avoid any potential delays to starting the build on your lot, we recommend that your builder submits your application as early as possible to give you a head start on the assessment process.

YOUR STEPS

HOT TIP!

It may seem daunting but often your builder has plenty of experience with this process.

Design

Your builder will work with you to design your home to comply with this document.

Proceed to Step 2 once you're happy with your design and your builder has drawn up the consolidated set of plans.

STEP 1

HOT TIP!

Please ensure that your builder attaches all the required documentation listed in the Covenant Application Form as part of the submission.

Submission

Your builder submits your house plans, colour schedules, landscape plans and proof of covenant payment (refer to Step 3) to the Design Committee via the Building @ Everleigh Portal.

STEP 2

HOT TIP!

Be sure to include the proof of bond payment as part of your covenant application to avoid a delay in the assessment and approval process. The bond will be returned after the final inspection (refer Step 9).

Covenant Bond Payment

Your fully refundable **Covenant Bond** is required to be deposited to the following account to be held in trust.

HWL Ebsworth Lawyers Law Practice Trust Account
BSB: 034-003 Acc Number: 246634
Description: "Surname & Lot Number" – Covenant Bond
Amount: \$1000

STEP 3

STEP 4

OUR STEPS

Assessment

The Design Committee will assess your submission for compliance with the **Design Standards & Guidelines**. During this process we will work with you and your builder if anything needs amendment. In some cases, plans may need to be resubmitted. This process normally takes 2 weeks if all information is provided.

STEP 5

Design Approval

The Design Committee will issue an approval when your submission has been assessed as complying with the Design Standards & Guidelines. Your stamped approved plans will be provided to you and your builder via the **Building @ Everleigh Portal**.

Please take care to note any comments on your Everleigh Design Committee stamped approved plans to ensure that all conditions of the Design Committee approval are addressed.

STEP 6

Building Approval

Once Design Committee approval has been issued, your builder can then make an application to your accredited building certifier/Council for the **statutory Building Approval**.

STEP 7

Construction

Please ensure that your lot is properly maintained to be free of excessive weeds, rubbish or garbage prior to and during the construction phase of your home. This will ensure that the land is safe at all times.

STEP 8

Call for Inspection

Once your house and landscaping is complete, please touch base with us via the **Building @ Everleigh Portal** to **organise your final inspection**.

STEP 9

Inspection & Refund

The covenant bond will then be refunded once **final compliance approval** is issued by the Design Committee and the **return bond form** is completed on the **Building @ Everleigh Portal**.

Design & Siting Standards

Approved Plan of Development — Envelope Plan and Design Criteria

We recommend that you speak with your builder or an Everleigh Sales Team representative who will be able to guide you through the Approved Plan of Development – Envelope Plan and the Approved Plan of Development – Design Criteria (PoD documents) and how these relate to your specific lot.

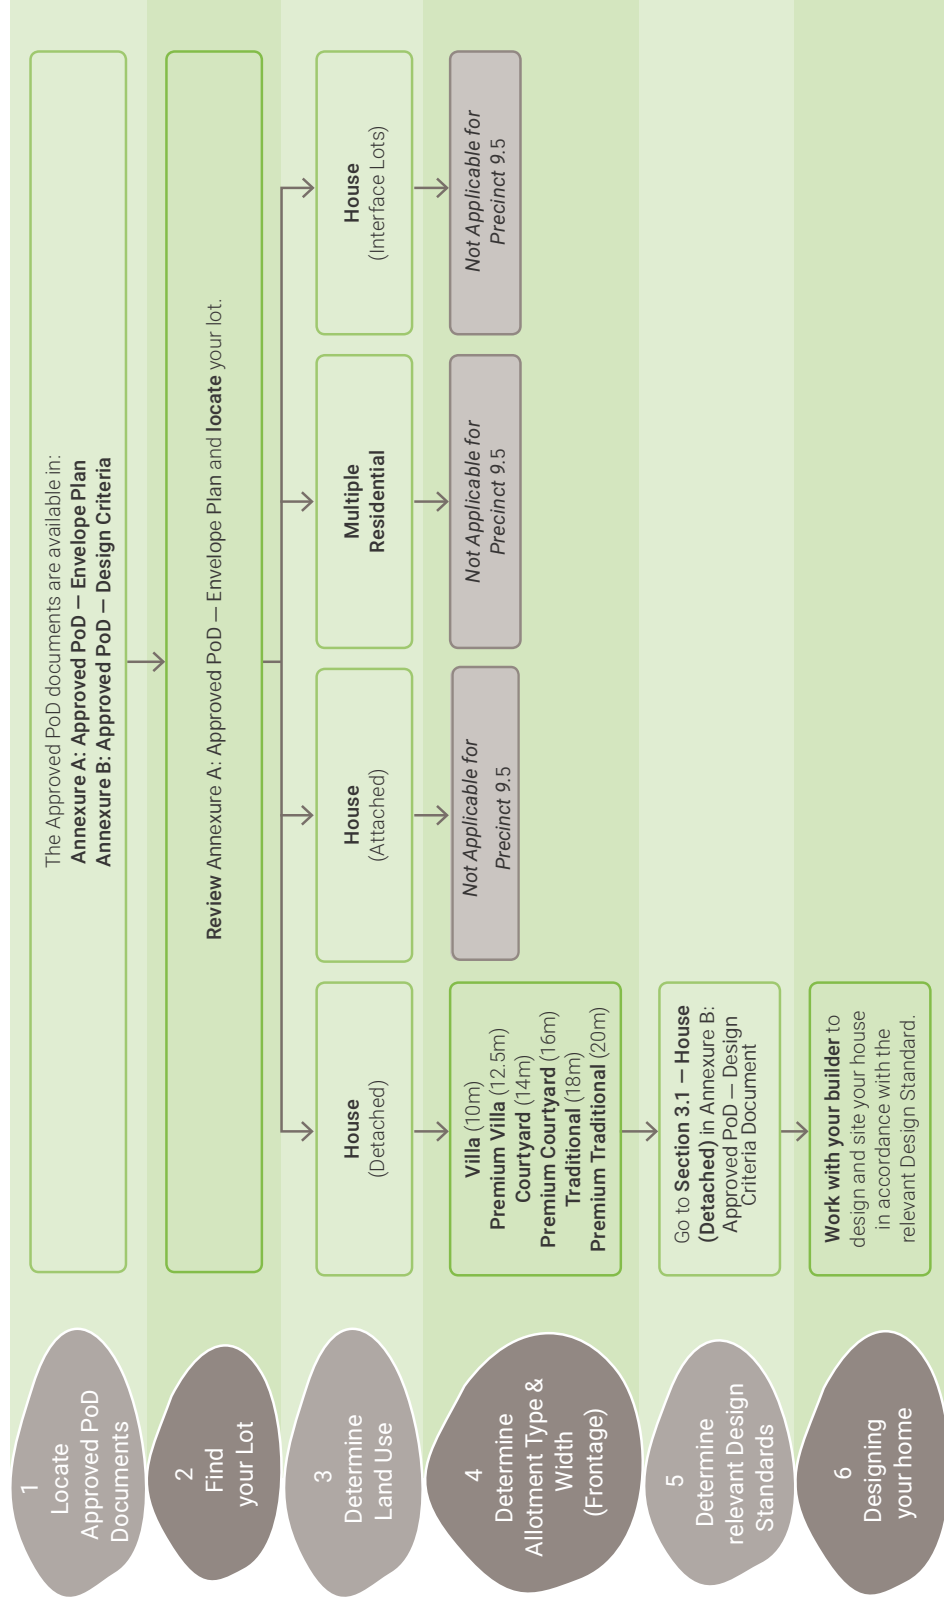

The Approved PoD documents are available in Annexure A and B. The Design and Siting Standards (Part 1) which includes the approved PoD documents should also be read with the Architectural and Landscape Design Standards (Part 2).

Where compliance with any particular design standard in Part 2 results in non-compliance with Part 1, then the design standard for Part 1 takes precedence. In all other instances, the design standards in Part 2 take precedence.

Provided overleaf is a simple flow chart with instructions on how to navigate the PoD documents should you wish to review and understand these provisions yourself.

They have been constructed to the required standards and Council and other service authorities have recorded them as correctly constructed prior to your house building commencing.
- These assets cannot be altered, including changing the ground levels, without the correct approval from Council. Mirvac inspects these assets at completion of your home to ensure no damage. Sustainable Living Guidelines

Mirvac considers sustainability and innovation to be key components in delivering cohesive communities that are safe, encourage healthy and active lifestyles and result in lower household expenses.

Objectives

- To set a new benchmark for high-quality sustainable living, and encourage the incorporation of best practice sustainable initiatives
- To provide and encourage opportunities for residents to reduce their environmental impact
- To provide and encourage opportunities for residents to reduce household expenses during operation

Energy Consumption and Greenhouse gas-emission reduction

- Mirvac encourages all homes to achieve a 7 Star NatHERS rating. This may be achieved through incorporation of the following elements where necessary –
 - Maximising opportunities for cross ventilation and provide high level operable windows in multi-level homes to allow for heat removal
 - Shading designed to restrict solar access to the living spaces in summer, whilst allowing beneficial solar access in winter.
 - Increased rating of the wall and ceiling insulation to the required specification
 - Treated glazing or double glazing where necessary
 - Draft sealing (weather seals on external doors etc.) where necessary
 - Sealed exhaust fans where necessary

Water Conservation and reuse

- To assist in achieving an overall reduction in household water usage, Mirvac recommends that homes incorporate the following measures:
 - Rainwater tanks for toilet flushing and irrigation
 - Dishwasher and washing machines with a 4 Star or greater WELS rating
 - Tapware and toilets with a 4 Star or greater WELS rating
 - Showers with a 3 Star WELS rating
 - Purchasers are encouraged to consider water efficient landscape design, soil mix, and plant selections, with a target of a minimum of 70% of planted species to be drought tolerant

Materials and Waste

- Maximise the use of standard sizes of materials wherever possible to minimise wastage
- Mirvac recommends the use of low-impact construction materials
 - For masonry consider low impact options, such as recycled or carbon neutral bricks
 - For lightweight construction, consider the use of natural or innovative materials such as timber, structural insulated panels or Hebel for a reduced environmental impact and good thermal performance qualities.
- Internal Finishes
 - Consider the use of flooring, joinery and plasterboard that is environmentally certified by independent certification schemes such as GECA, EcoSpecifier or the Carpet Institute of Australia
 - Select high quality, durable finishes with long warranty periods
- To reduce the airborne chemicals within your home consider the following products
 - Engineered wood products, such as kitchen cabinetry and wardrobes, with low or zero formaldehyde (rated as E1 or E0)
 - Paints, adhesives and carpets rated to have low levels of volatile organic compounds (VOCs)
- To reduce waste to landfill during the operation of your home, consider
 - Installing a dual bin in the kitchen joinery to make recycling as easy as disposing of general waste
 - The use of a worm farm or composting bin to reduce food waste and provide fertiliser for your gardens.

Smart Technology

- Smart monitoring
 - Consider the use of smart meters to help track your energy consumption and reduce your bills even further
- Smart home automation
 - Consider the use of smart home automation to make your life easier and future proof your home. Systems available include:
 - Smart Security systems
 - Smart intercom and access controls
 - Smart controls of lighting, blinds, air conditioning and appliances
 - Audio Visual systems
 - If solar electricity and/or batteries are installed, consider a fully electric house to avoid the need for a natural gas connection.

Landscaping

- The use of permeable surfaces is encouraged to maximise opportunities for natural infiltration and groundwater recharge
- The use of waterwise plant species, waterwise irrigation and mulching of garden beds is encouraged to reduce water use
- The planting of trees offering shade for the house and outdoor living areas and contributing to bird habitat is encouraged
- The use of locally native plant species is encouraged to increase biodiversity
- Consider the use of herbs, vegetables and fruit trees to create a productive garden

HOT TIP!

Please refer to Annexure D for the Landscaping Design Guidelines including concepts and example planting palettes to help you achieve a high quality landscape outcome.

- The maximum roof pitch is 14 degrees.

Parking and Driveways

- A minimum of two on-site car parking spaces must be provided for each dwelling, one of which must be within a garage.

- Where accessed from a laneway, garages are to be paired (built to a common boundary where possible).
- The driveway finish must not be plain concrete.
- Driveways are to be:

- a minimum distance of 6m from an intersection of one street with another street; and
- designed and constructed in accordance with approval / permit requirements of Logan City Council.

The pad level can be assumed to be the average of the four corners of the adjacent block using the As Built levels. The build down of the built to boundary wall must be in a material consistent with the visible section of the wall immediately above it.
- Where on a lot with a rear retaining wall exceeding 2.0m above ground level (or where identified on the Plan of Development - Envelope Plans), the Rear Setback is as per Table 5.

Landscape Design Guidelines

Everleigh Landscape Design Guidelines

The following planting plans present typical garden layouts.

Plans require customisation to suit the unique site conditions.

Designs must meet requirements outlined in the Part 2: Architectural and Landscape Design Standards of the Everleigh Residential Design Standards & Guidelines.

Refer to the plant palette for recommended species list.

Be sure to seek advice from your engineer for any retaining walls or fencing requirements.

General Landscape Design Notes

Give consideration to the following:

- Protect and enhance favourable existing views and vistas through considerate placement of trees and shrubs
- Locate trees and shrubs to provide adequate privacy between neighbours and the public realm
- Provide a balance of sun penetration, shading and wind screening
- Consider the location of windows and the mature heights of shrubs when planting around the house perimeter to preserve views into the garden and prevent overshadowing of the interior
- Consider service locations and potential conflicts with trees
- Provide safe and comfortable access to gates and doorways
- Ensure pathways and pavements are stable, even and non-slip in all weather conditions with adequate crossfalls to prevent ponding of water
- Do not plant spiky plants next to pathways
- Maintain adequate sightlines for drivers and pedestrians in the vicinity of driveways and ensure plants with a mature height of under 500mm are chosen for critical locations
- Manage site water to ensure stormwater runs off away from buildings and waterlogging is minimised
- Consider the site's aspect and predict the amount of sun and shade plants will likely receive when selecting species from the plant palette

Retaining Wall Fact Sheet and Owner Obligations

The Everleigh team have carefully considered and prepared your land during the civil works to ensure the best outcome for your future build. This fact sheet outlines some key ongoing owner obligations to ensure that your retaining walls are well maintained throughout the life of the property.

When designing retaining walls, Mirvac prefer the use of either:

- Boulders, stone or masonry, usually for areas facing the street areas to maximise street appeal, or
- Concrete sleeper panel walls to minimise the impact the structure has on useable land and to reduce maintenance costs because of the robust nature of concrete.

As these retaining walls are contained within private property the land owner owns them and has a responsibility to monitor and maintain the retaining walls. At Everleigh, retaining walls between private lots are located on the common boundary, and hence adjoining landowners share a responsibility to maintain the wall. The following information is provided to assist all homeowners and their builders.

The retaining walls have been designed in accordance with:

- All relevant Australian Standards
- Applicable Logan City Council approvals
- A 5kPa surcharge loading above the retaining wall
- Maximum 1 in 10 back slope above concrete sleeper retaining wall
- Existing site soil properties

In order to avoid adversely affecting the structural integrity of the retaining wall, each land owner has a responsibility to ensure the following (including making builders or tenants aware):

- That works adjacent to the retaining wall structure complies with the design parameters noted above
- That no open excavations, alterations or modifications are permitted within the zone of influence without Engineering assessment. Refer to sketch for definition of 'zone of influence'
- That no structures or trees are installed within the zone of influence (both above and below the retaining wall) without Engineering assessment
- Water is not permitted to pond within the zone of influence above or below the wall
- Any site works within any individual allotment must not disrupt the wall drainage including limiting discharge from the retaining wall

- The retaining walls have been constructed with a subsoil drain located on the common boundary between you and your neighbour's property. A non-slotted sub-soil drain outlet has been installed with a marker post labelled 'Retaining Wall Subsoil Outlet' on relevant lots. Your builder should connect this outlet to the yard / roofwater drainage system they install as part of their house contract works. Connecting this drain will mitigate the chance of water ponding in your backyard. Refer to sketch of 'typical retaining wall subsoil outlet to allotments' for further detail.
 - No machinery is to be used above the retaining wall where it would result in a load more than the 5kPa limit noted above as this may cause deformation of the wall components
 - The wall height is not to be raised by any method, including bolting on or constructing an additional retaining wall above, without obtaining an engineering assessment of the effects on the wall
- Installation of a solid 1.8m boundary fence on or adjacent to the wall (depending on boundary location and/or agreement with neighbour) is acceptable provided the consideration given to the items raised above. As with all fences, design and construction of the fence is the owner's responsibility.

Zone of Influence

The following information is provided as a general guide. If you are unsure you should consult with a suitably qualified engineer to confirm the actual extent of the zone of influence.

For example, if the wall height (H) is 1.6m then:

For the Lower Lot the Zone of Influence extends from the base of the wall for $H \times 1.25$ or $1.6\text{m} \times 1.25 = 2\text{m}$

For the Upper Lot the Zone of Influence extends from the base of the wall for $H \times 1.25$ or $1.6\text{m} \times 1.25 = 2\text{m}$

Typical Retaining Wall Subsoil Outlet on Relevant Low Side Allotments

Installed in the rear corner of relevant allotments located on the low side of a retaining wall.

Non-slotted subsoil drain outlet from the main retaining wall subsoil drainage into individual lot. Your Builder should connect this outlet to the roofwater drainage system they install to mitigate the chance of ponding in the backyard.

 - no structures or trees are installed within the zone of influence (both above and below the retaining wall) without Engineering assessment in writing
 - water is not permitted to pond within the zone of influence above or below the wall
 - any site works within any individual allotment must not disrupt the wall drainage including limiting discharge from the retaining wall
 - no machinery is to be used above the retaining wall where it would result in a load more than the 5kPa as this may cause deformation of the wall components
 - the wall height is not to be raised by any method, including bolting on or constructing an additional retaining wall above, without obtaining an Engineering assessment of the effects on the wall (noting that installation of a solid 1.8m boundary fence on or adjacent to the wall (depending on boundary location and/or agreement with neighbour) is acceptable provided consideration is given to the items raised above).
- (c) you are not the Warranty Holder;
- (d) you fail to make a claim under this product warranty strictly within 3 months of becoming aware, or when you should reasonably have become aware, of the failure in the structural integrity of the retaining wall.

The benefit of this warranty may be transferred to a new land owner if the property is sold subject to:

- The Warranty Holder making a written request to WRB; and
- WRB agreeing in writing to transfer the benefit of the warranty (acting reasonably).

penalties, fines, interest, duties, fees, taxes or legal fees on a full indemnity basis) which the Seller or any Third Party may suffer as a result of or arising directly or indirectly out of:

 - (j) other person who was named, intended or required to enter into this Guarantee and Indemnity not having done so or not having done so effectively;
 - (k) waiver or other indulgence or the discharge or release of a Buyer or any other person from any obligation;
 - (l) guarantee and indemnity from any other person who has entered into this Guarantee and Indemnity not being, for any reason whatsoever, enforceable; or
 - (m) other acts, omission, thing or matter whatsoever which, but for this provision, might in any way operate to release or otherwise exonerate or discharge the Guarantor from any of its obligations as surety.
7. This Guarantee and Indemnity:
- (a) extends to cover the Buyer's obligations under a Relevant Contract:
 - (i) regardless of any compromise, waiver or variation of any rights against the Buyer under the Relevant Contract; and
 - (ii) as amended, varied or replaced, whether with or without the consent of the Guarantor, even if the amendment, variation or replacement imposes additional obligations on the Buyer, beyond those presently in the Relevant Contract; and
 - (b) is a continuing guarantee and indemnity and, despite Settlement, remains in full force and effect for as long as the Buyer has any liability or obligation under the Relevant Contract and until all of those liabilities or obligations have been fully discharged.
8. The Guarantor represents to the Seller (and for the benefit of any Third Party) that before the Guarantor entered into this Guarantee and Indemnity the Guarantor read and understood this Guarantee and Indemnity, the Contract and any other associated documents and had taken or been given the opportunity to take legal and other advice the Guarantor considered necessary.

9. If the Seller or a Third Party novates, transfers or assigns its interest in a Relevant Contract in favour of any person or entity (**Assignee**), the benefit of the Guarantor's obligations and indemnities under this Guarantee and Indemnity are assigned to the Assignee and the Guarantor must enter into any document that the Seller or a Third Party or Assignee may reasonably require to confirm the assignment. The Seller or a Third Party may assign the benefit of the Guarantor's obligations and indemnities under this Guarantee and Indemnity without affecting or discharging the Guarantor's liability as surety in any way.

11. This Guarantee and Indemnity binds each Guarantor individually and all of them jointly.
12. This Guarantee and Indemnity is a separate, collateral instrument to the Relevant Contracts.
13. The liability of the Guarantor is not discharged by payment to the Seller or a Third Party which is later avoided by law. If that occurs, the respective rights and obligations of the Seller or a Third Party and the Guarantor will be restored as if the payment had not been made.
14. Money paid to the Seller or a Third Party by the Guarantor must be applied first against payment of costs, charges and expenses under clause 5, then against other obligations under this Guarantee and Indemnity.
15. If there is any ambiguity in this Guarantee and Indemnity, it is to be interpreted in favour of the Seller or a Third Party. Any void, voidable or illegal term of this Guarantee and Indemnity is to be read down or severed leaving the balance operable.
16. The Guarantor acknowledges and agrees that this Guarantee and Indemnity was signed by the Guarantor before the Seller signed the Contract.
17. This Guarantee and Indemnity may be executed, exchanged and delivered in any manner permitted under the Contract for the execution and exchange of that document (including electronically).
18. Notices under this Guarantee and Indemnity are to be given in the manner set out under the Contract. The Seller may give notices to the Guarantor by giving the notice to the Buyer or the Buyer's Solicitor, including in the same instrument as any notice that is given to the Buyer.

WARNING: The Guarantor is agreeing to be legally liable for the performance of the Buyer under the Relevant Contract.

While the Seller will attempt to deliver within the timeframe communicated, the Seller does not represent or warrant that registration will occur within the timeframe advised.

I/We acknowledge that I/we are aware of the risks of possible delays with registration of the Lots, which may impact my/our building contract (for example, a delay in commencement of construction of the dwelling may affect/increase the building contract price). I/We acknowledge that it is important that I/we communicate with my/our builder to discuss possible delays to ensure that I/we are informed on what impact any delays would have on the building contract and that I/we have had such discussions with the builder.

I/We acknowledge that it is my/our responsibility to inspect the land and ensure that survey pegs are properly installed prior to settlement. Once settlement has occurred, Mirvac will not be responsible for having any missing or damaged survey pegs installed on the land if this was not raised with Mirvac no later than 7 days after settlement.

I/We acknowledge that Mirvac will not mediate disputes about building debris or damage to my/our land with neighbours and that Mirvac has encouraged me/us to install temporary construction fencing before construction commences on the land. I/We acknowledge that I/we cannot alter or impact any already-installed fencing or retaining walls on my/our land without first obtaining prior written approval from Mirvac and any affected neighbours.

I/We acknowledge the Contract permits Mirvac to collect, use and disclose my/our personal information for neighbouring lot communication and that by signing the Contract I/we consent to that collection, use and disclosure pursuant to the terms of the Contract.
